DEADLY RUSS BAYONETS **WON ERZERUM FORTRESS**

Heroic Charge of Caucasian Troops Broke Turks' Defence.

Magnificent Position Fell After Light Bombardment.

(By Times Special Cable.)

Petrograd, Feb. 18, via London.—The fall of Erzerum, the most important Turkish stronghold in Asia Minor, and for a long timensidered impregnable, offers the unprecedented speciacle of a first-class fortress, built on a steep mountain ridge nearly a mile above sea level, yielding to bayonet attack after only 36 hours' bombardment.

The operations were conducted under the most severe weather

bombardment.

The operations were conducted under the most severe weather conditions, the anow being deep, and the thermometer registering at times more than 30 degrees below zero, Fahrenheit.

The Turkish army defending Erserum, taken by surprise under the methods adopted by the Russians, is now said to be in desorderly light on the roads leading to Sivas. As the garrison apparently reattered in all directions, it is assumed here that large numbers of men were taken prisoner, although official figures are still lacking. After the taking of Niskala, it appeared that the Russian attack would be directed upon the Turkish right flank, and by rapidly transferring troops the Turks made all plans to resist the main assault from this quarter. Apparently they had little fear of the success of this attack, because of the strong character of the fortifications in that direction, and even less apprehension of danger from a frontal attack.

Nevertheless, after the Russians succeeded in taking by storm the first line forts on Feb. 2, there began a persistant bombardment of the Turkish centre, followed by a bayonet charge, the impetuously of which swept the defenders off their feet. The highest tribute is judd to the travers of the Cusacian twops, whose charge is considered likely to go down in history as one of the most brilliant feats of the war. It is recognized here that the success of the assault was due almost entirely to the bayonet work of these troops, since the strillery preparation was insufficient in tinantity and duration, according to military experts, to reduce even a strong field position. to military experts, to reduce even a strong field posit

A STATESMANLIKE SPEECH.

Mr. A. K. Maclesan. or Hallfax. the financial critic of the Liberal Opposition, took up the debate in the libeus yesterday on the budget presented by Sir Thomas White. Mr. Maclesan made a stirring appeal to the members to rise above party while the country was facing the greatest crisis in her history. He saked them to "introduce bushness and conscience" into their desiling with the estimates. Perhaps has destriped the country that the country was facing the greatest crisis in her history. The Philadelphia Record says Canadians are too nervous. "An invasion from Germany is much more probable than one from the United States, and the menace from the Kaiser's army can hardly be called alarming."

The Board of Control to-day can-elled the franchise of the National Natural Gas Company, claiming that gas is not being delivered according to agreement, but that it is being sold to contaiders. If the city can prove these contentions there will be no trouble. The controllers should not rest with this. They should take steps to have the coke, ovens established and a sufficient supply of some kind of gas for the use of the people.

ON WHICH SIDE ARE YOU?

Is the "if" in your case really too big for you to get around? Or just don't you want to? Which?

Is your "if" an honest, honorable, conscientious explanation as to why you can't go? Or, like the man in the picture, are you just a little bit—well, say timid about going?

Can you look the recruiting sergeant squarely in the eye and BELIEVE IN YOUR OWN HEART what you tell him when you say, "I would go, if-...."

173rd Highland Battalion

The 173rd is allied with the Argyle and Suther-land Highlanders of the old land. It has a great name to the up to. It is going to do the best it can, and it wants within its ranks only the kind of men that will help it towards this glorious goal. Are you that sort? If you are, there's plenty of room, hospitality, good comradeship (and "action," we hope) here for you.

ANADA should NOT be Branded as INTEMPERATE

One would imagine from the sensational utterances of many prohibition exhorters, that Canadians are a very drunken people, or, as someone has expressed it, "Alcohol is simply rampant!"—whatever that may mean. This exaggeration is indulg ed in, of course, to intensify the necessity for the great panacea for all human ills, namely, Prohibition.

Canadians are

Now, as a matter of fact, Canadians are a very temperate people; and the proof of this assertion may be established in many ways. For example, in 1918, of all the cases admitted to the contained of the total, Again: The consumption of the total, Again: The consumption of the total, Again: The consumption of the contained and 1.2 gallons of beer-less than was consumed in each of the countries named with the exception of Russis, which is not a beer-drinking country.

It is not and conservated of an insult, therefore, to

Unjust and

Insulting

It is not only somewhat of an insult, therefore, to the people of Canada, but also absolutely untrue, to say that drunkenness, with all its lowering of the tone of morality, is rampant.

But our Prohibition friends seem to be shifting apparently concerned more now in the most at present. This is a decided them most at present. This is a decided falling from grace, for these gentlemen have hitherto always waived aside the base material view of the question and stood upon alleged high moral grounds, especially when they were asked how they proposed to make up a loss of revenue.

Drink is Not the Curse of Ontario

Curse of Ontario

Surely there are in Ontario to-day many evils which will suggest themselves to all thinking persons, that are doing infinitely more than is drunkenness to undermine the vigor, moral and physical, of our people? Again, would all the money, now spent in drink be saved by Prohibition? Most decidedly not; otherwise Prohibition countries and districts now would be better off than others. And, at any rate, it is not lost. The Government gets a large share of it in revenue, the Farmer is paid for his product, the worker for his toil, and so on through the whole list. Still once more: What about the hundred and one other things without which existence might presumably be possible coffee, tes, oc-called soft drinks, etc., upon which far more is spent than upon alcoholic beverages?

Stand by the License System

Would it not then be a good thing just now to observe the old maxim "Leave well enough alone" in this matter as in many another; to see to it that the present license laws are observed, and to endeavor, each one as far as in him lies, to promote the growth of real temperance, not that exotic monstrosity which our misguided friends are so carefully trying to nurture?

THE PERSONAL LIBERTY LEAGUE OF ONTARIO believes in Temperance in all things, and in its promotion, we favor the license system under proper regulation and control, but are opposed to prohibition or any legislation which encroaches upon or curtails the purely personal liberties of our people.

Application for membership cards should be sent to The Personal Liberty League of Ontario, Head Office, 15 Wilton Avenue, Toronto. No fees are required for membership in the league.

Fill out the application for membership and forward to the Secretary of the Personal Liberty League.
